Developed at Puducherry Technological University

Peace: a daily companion for mental well-being.

A free Android app that helps students check in with themselves every day, screen with validated questionnaires, and reach professional help in one tap.

Daily mood check-in | Validated screening | Tele-MANAS 14416

WHAT PEACE DOES

Check in. Understand. Reach out.

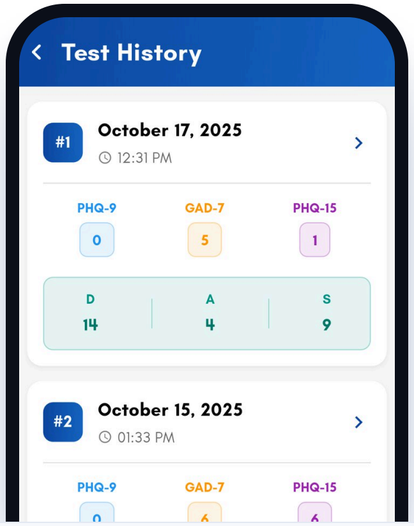

Check in every day

Log today's mood in seconds. A 7-day tracker and a streak turn it into a gentle habit.

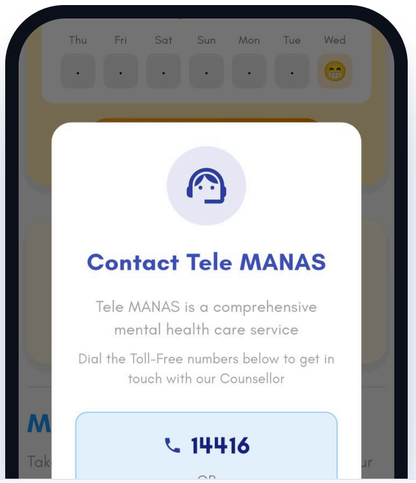

Understand with evidence

Take standard screening questionnaires and follow your scores over time, with plain-language explanations.

Reach out, one tap

Tele-MANAS, India's free national tele-mental-health service, is built into the home screen. A low mood brings up a prompt to talk to someone.

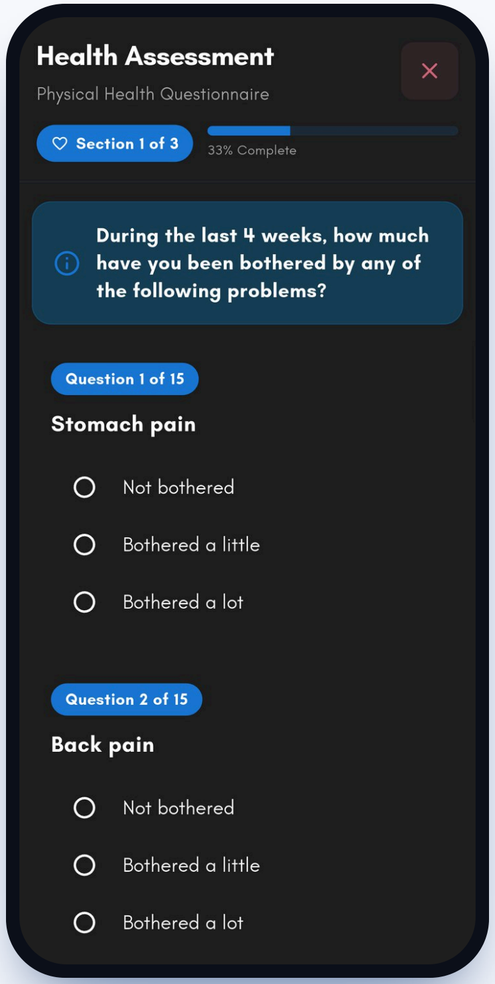

ASSESSMENTS

Established instruments, familiar to clinicians.

INSTRUMENT	SCREENS FOR	ITEMS	SEVERITY BANDS
PHQ-9 last 2 weeks	Depression	9	Minimal · Mild · Moderate · Mod. severe · Severe
GAD-7 last 2 weeks	Anxiety	7	Minimal · Mild · Moderate · Severe
PHQ-15 last 4 weeks	Physical symptoms	15	Minimal · Low · Medium · High
PHQ panic module	Panic symptoms	4	Follow-up questions
DASS-42 optional	Depression, anxiety, stress	42	Normal · Mild · Moderate · Severe · Extremely severe

A screening tool, not a diagnosis. Results help students decide when to seek support and should be interpreted by a qualified mental health professional. A full assessment takes about 10–15 minutes.

FOR COUNSELLORS & INSTITUTIONS

A bridge between check-ins and conversations.

Earlier self-awareness

Daily mood logs and self-screening help students notice changes before they become harder to manage.

Better-informed sessions

Students can open their dated history of standard scores on their phone and walk through it with a counsellor, instead of recalling weeks from memory.

A clear path to help

Tele-MANAS is always one tap away, and a low mood brings up a prompt to talk to someone.

Private by design

- ✓ **Phone-number sign-in**, with no passwords to manage
- ✓ Each user's data is locked to **their own account**
- ✓ **No institutional dashboard.** Students choose what to share
- ✓ Deleting an account **removes all of that user's data**

What Peace is not

Not a diagnostic tool, not a crisis service, and not a replacement for professional care.

GET STARTED

Get Peace in about two minutes.

Free for everyone. Download it directly from the official website.

Scan to download

gowthamaanp.github.io/peace

1 **Download the app**

Scan the code and tap “Download for Android”.

2 **Allow the install**

If Android asks, allow installs from your browser for this one time.

3 **Sign in and check in**

Verify your phone number, log today's mood, and take an assessment when ready.
